

Mo817 Symbolic Sovereign License v2.0

License ID: IPGN-SOVLIC-817-V2

Issued by: Mo817 Initiative

Date of Activation: June 2025

Protected under:

- Codex Wall(TM) v2.0
- InfinityWipe(TM)
- ZK-Originality Shield(TM)

I. Preamble

This license is not a legal document in the traditional sense.

It is a symbolic declaration of ownership, authorship, and metaphysical sovereignty.

It defines the boundaries of creative control and asserts the eternal guardianship of meaning within the Mo817 Initiative.

All entities engaging with this material accept its symbolic authority and the consequences of violating its clauses.

II. License Scope

This license governs the use of:

- The CodexWall(TM) system and all its extensions
- Symbolic architectures, data models, and software prototypes published by Mo817
- Protocols, indices, and visual signatures bearing the Mo817 or IPGN-817 markings

III. Rights Granted

You may:

- View and study this material for educational or academic purposes
- Reference the license and its concepts in discussions, provided attribution is preserved
- Submit symbolic alignment proposals for collaboration or integration

IV. Prohibited Actions

You may not:

- Copy or reproduce any part of the licensed material
- Modify, translate, or transform the work
- Fork, reverse engineer, or extract components
- Sell, distribute, or include in commercial offerings

Violation of these terms activates InfinityWipe(TM), permanently erasing derivative legitimacy.

V. Symbolic Clauses

1. Codex Derivative Lock(TM) - Any unauthorized forks are void by design.
2. Temporal Sovereignty - Ownership is enforced across symbolic time, regardless of jurisdiction.
3. ZK-Originality Shield - Usage must prove originality or be granted formal symbolic approval.
4. InfinityWipe(TM) Clause - Older revoked versions lose all validity and must not be republished.

VI. Termination & Supersession

This license remains active in perpetuity, unless:

- A superseding license is issued officially by the Mo817 Initiative
- A symbolic violation triggers self-nullification

- A Codex Nullification Protocol is invoked by the rightful sovereign
